

TRI[®]

Original components of Swiss quality

TRI® and Elysee Dental join forces

to provide you with affordable bundle prices

Swiss quality implants combined with custom-made dental products of the highest quality.

Elysee Dental is proud to announce the exclusive cooperation with TRI® Dental Implants. TRI® Dental Implants is a fast growing global provider of digital implant solutions. Designed and manufactured in Switzerland, TRI® Dental Implants provides high-quality, innovative, and easy to use implant solutions for the benefit of patients worldwide.

With this cooperation, we are dedicated to providing you with the highest quality dental products, which are custom-made in our laboratories from impressions or scans, with original TRI® implants in one package. We can already offer you this total package for an amount of **€400,-**. Besides this attractive price, we also offer you a lifelong warranty on the implants.

The packages can be ordered within three implant lines: TRI® - Narrow, TRI® - Vent (bone level), and TRI® - Octa (tissue level).

With this cooperation, we now have the possibility as solution provider to deliver a "one-stop-shop" implant package, offered to both dentists and implantologists. One complete package for the entirety of your implant treatment.

On the following pages, I would like to take the opportunity to tell you a bit more about TRI® Dental Implants and the solutions they are offering. I will also tell you more about the price and content of the packages we can deliver.

Are you interested in this solution? Then, you are kindly invited to follow one of our TRI® webinars. You can also contact our TRI® Dental Implants specialist Frank Veen at **+31 (0)6 51 29 64 13**, or visit our website: www.elysee-dental.nl.

Best regards,

Roeland de Paepe
Productmanager Modern Dental Europe

Why TRI® is the perfect implant system

for implant treatments

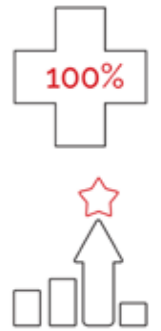

From its very beginning, TRI® has developed unique products and created new concepts that shaped and influenced the industry. Every TRI® product represents the five tenets TRI® stands for.

1. Swiss Quality

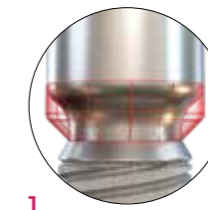

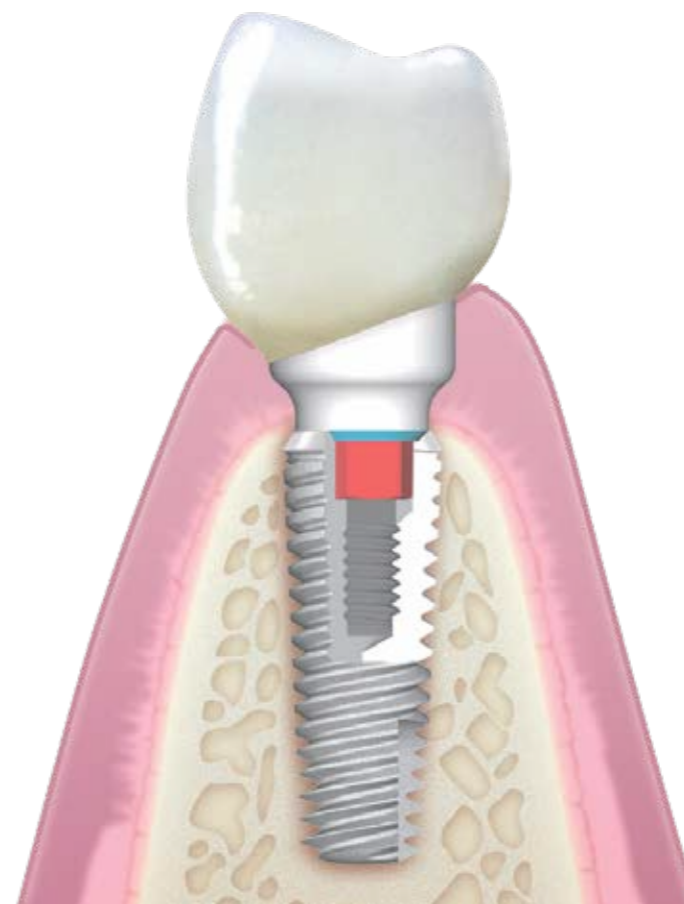

The total package of implant and implant components is designed and manufactured in Embrach, Zurich. Each part of the implant process has a high standard check, so the highest quality can be guaranteed at all times.

2. Performance

The TRI® Dental Implant System integrates four essential technology features. Each feature aims to provide maximum performance and lasting quality for the treatment of the dentist. TRI® combines these elements in the TRI® Performance Concept.

TRI® Performance Concept
4 Gold Standards in One

1

Soft tissue concept

- Integrative platform-switch concept to preserve the crestal bone
- Consistent soft tissue management within all prosthetic components
- Homogeneous transition between implant and abutment to avoid "dirt pockets"

2

Friction

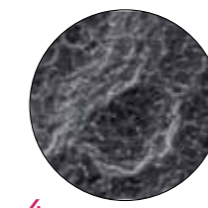

- Secure abutment stability through a dense tapered press fit
- Elimination of micro-movements between implant and abutment
- Internal hex for guided abutment positioning

3

Boneadapt

- High primary stability through a tapered implant body with self-cutting thread
- Bio-mechanical bone-adaptation with maximum bone-to-implant contact
- Optimized conservation of the cortical bone through macro-thread design

4

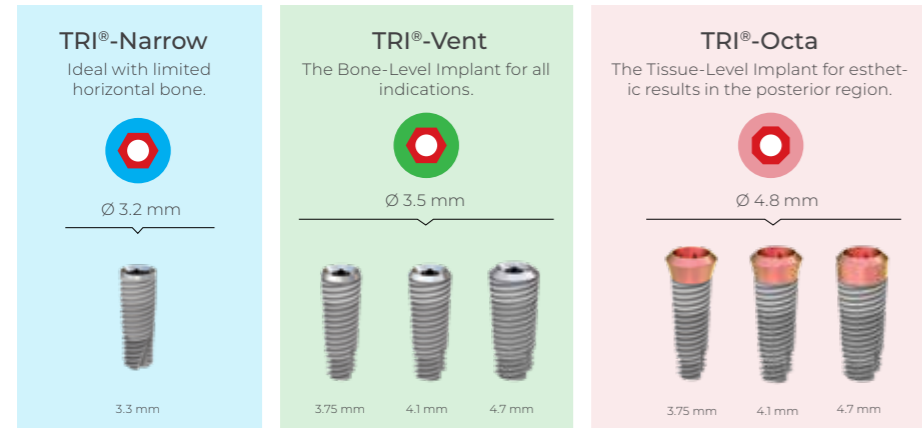

SBA* Surface

- Fast and reliable osseointegration
- Industry gold standard for secure osseointegration for more than 20 years
- World's most scientifically proven surface technology.

*SBA: Sand-Blasted, large-grit, double Acid-etched **3.**

3. Simplicity

The TRI® Dental Implant System consists of three implant lines. All implant lines can be placed with one lean surgical kit.

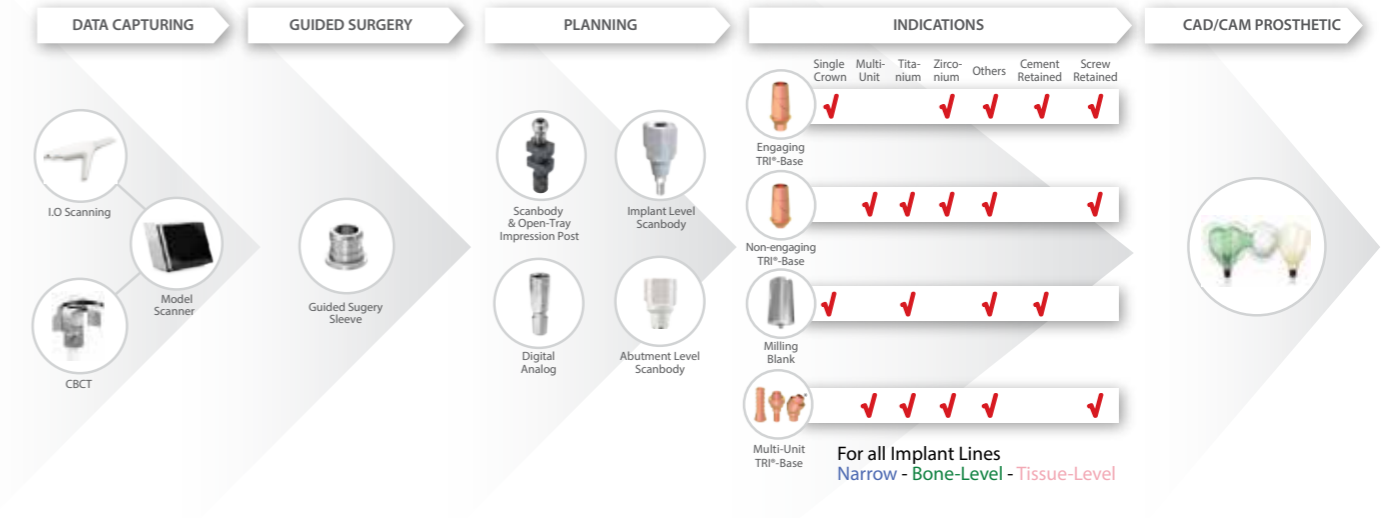

Diameters & Lengths

	Ø 3.3 mm	Ø 3.75 mm	Ø 4.1 mm	Ø 4.7 mm
L 6.5 mm			● ●	● ●
L 8 mm		● ●	● ●	● ●
L 10 mm	●	● ●	● ●	● ●
L 11.5 mm	● (L 11 mm)	● ●	● ●	● ●
L 13 mm	●	● ●	● ●	● ●
L 16 mm	●	●	●	●

4. Think Digital

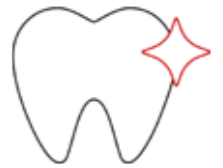

TRI® Dental Implants sets new standards with TRI+ Digital as a universal implant interface to leading technology partners in digital dentistry. Linked with a lean dental implant system, TRI+ Digital offers treatment options from simple to complex without limits:

- + 3D-planning & guided surgery
- + Customised CAD abutments
- + CAD/CAM cement-retained crowns and bridges
- + CAD/CAM screw-retained bars and bridges

5. Fair Price

The regular price of TRI® Implants is up to 50% lower than other systems. With this cooperation, we can offer you a total package of original implant components with custom-made, high quality dental products for an amount of €400,-. We provide original products against a fair price and a lifelong warranty on the implants.
